CLIENT ENGAGEMENT MODELS

HOW WE COOPERATE

IT OUTSOURCING

Companies rely on Smart Tek to provide engineering and digital talent to accelerate innovation and growth.

IT OUTSTAFFING

It is a great model for large and continuous projects and companies with an adequately managed software development team that needs to scale up fast.

DEDICATED TEAM

It is an efficient way to add top talent to your software development staff. Based on market research, adding nearshore dedicated teams leads to a 40–60% cost reduction, faster time to market, and higher revenues.

OFFSHORE DEVELOPMENT CENTER

Setting up an offshore development center is an excellent strategic move for companies striving to expand their production with a reasonable amount of company resources.

TIME & MATERIALS

Popularly abbreviated as the T&M Model, this engagement arrangement is preferred when the scope of work associated with a project isn't fully defined and will be continuously evolving.

The T&M Engagement Model is ideal for:

Support & Maintenance Contracts

Complex Large-Scale Projects

Solution Design

Continuous Product Evolution Programming

Research and Consulting Assignments

FIXED PRICE

The Fixed Price Model is associated with a pre-determined project cost. It's ideal to use when you have well-defined project requirements for the solution or application you wish to develop.

The T&M Engagement Model is ideal for:

When a list of tasks is defined 100%, and the probability of change is doubtful.

Flexibility is not needed since everything has been agreed upon in advance.

Turnkey approach — where only minor changes are made to adapt to a specific customer.

A small project both in the scope of work and timeline.

**SOME OF
OUR WORKS**

DIGITALIZATION OF BUSINESS BY ERP SYSTEMS

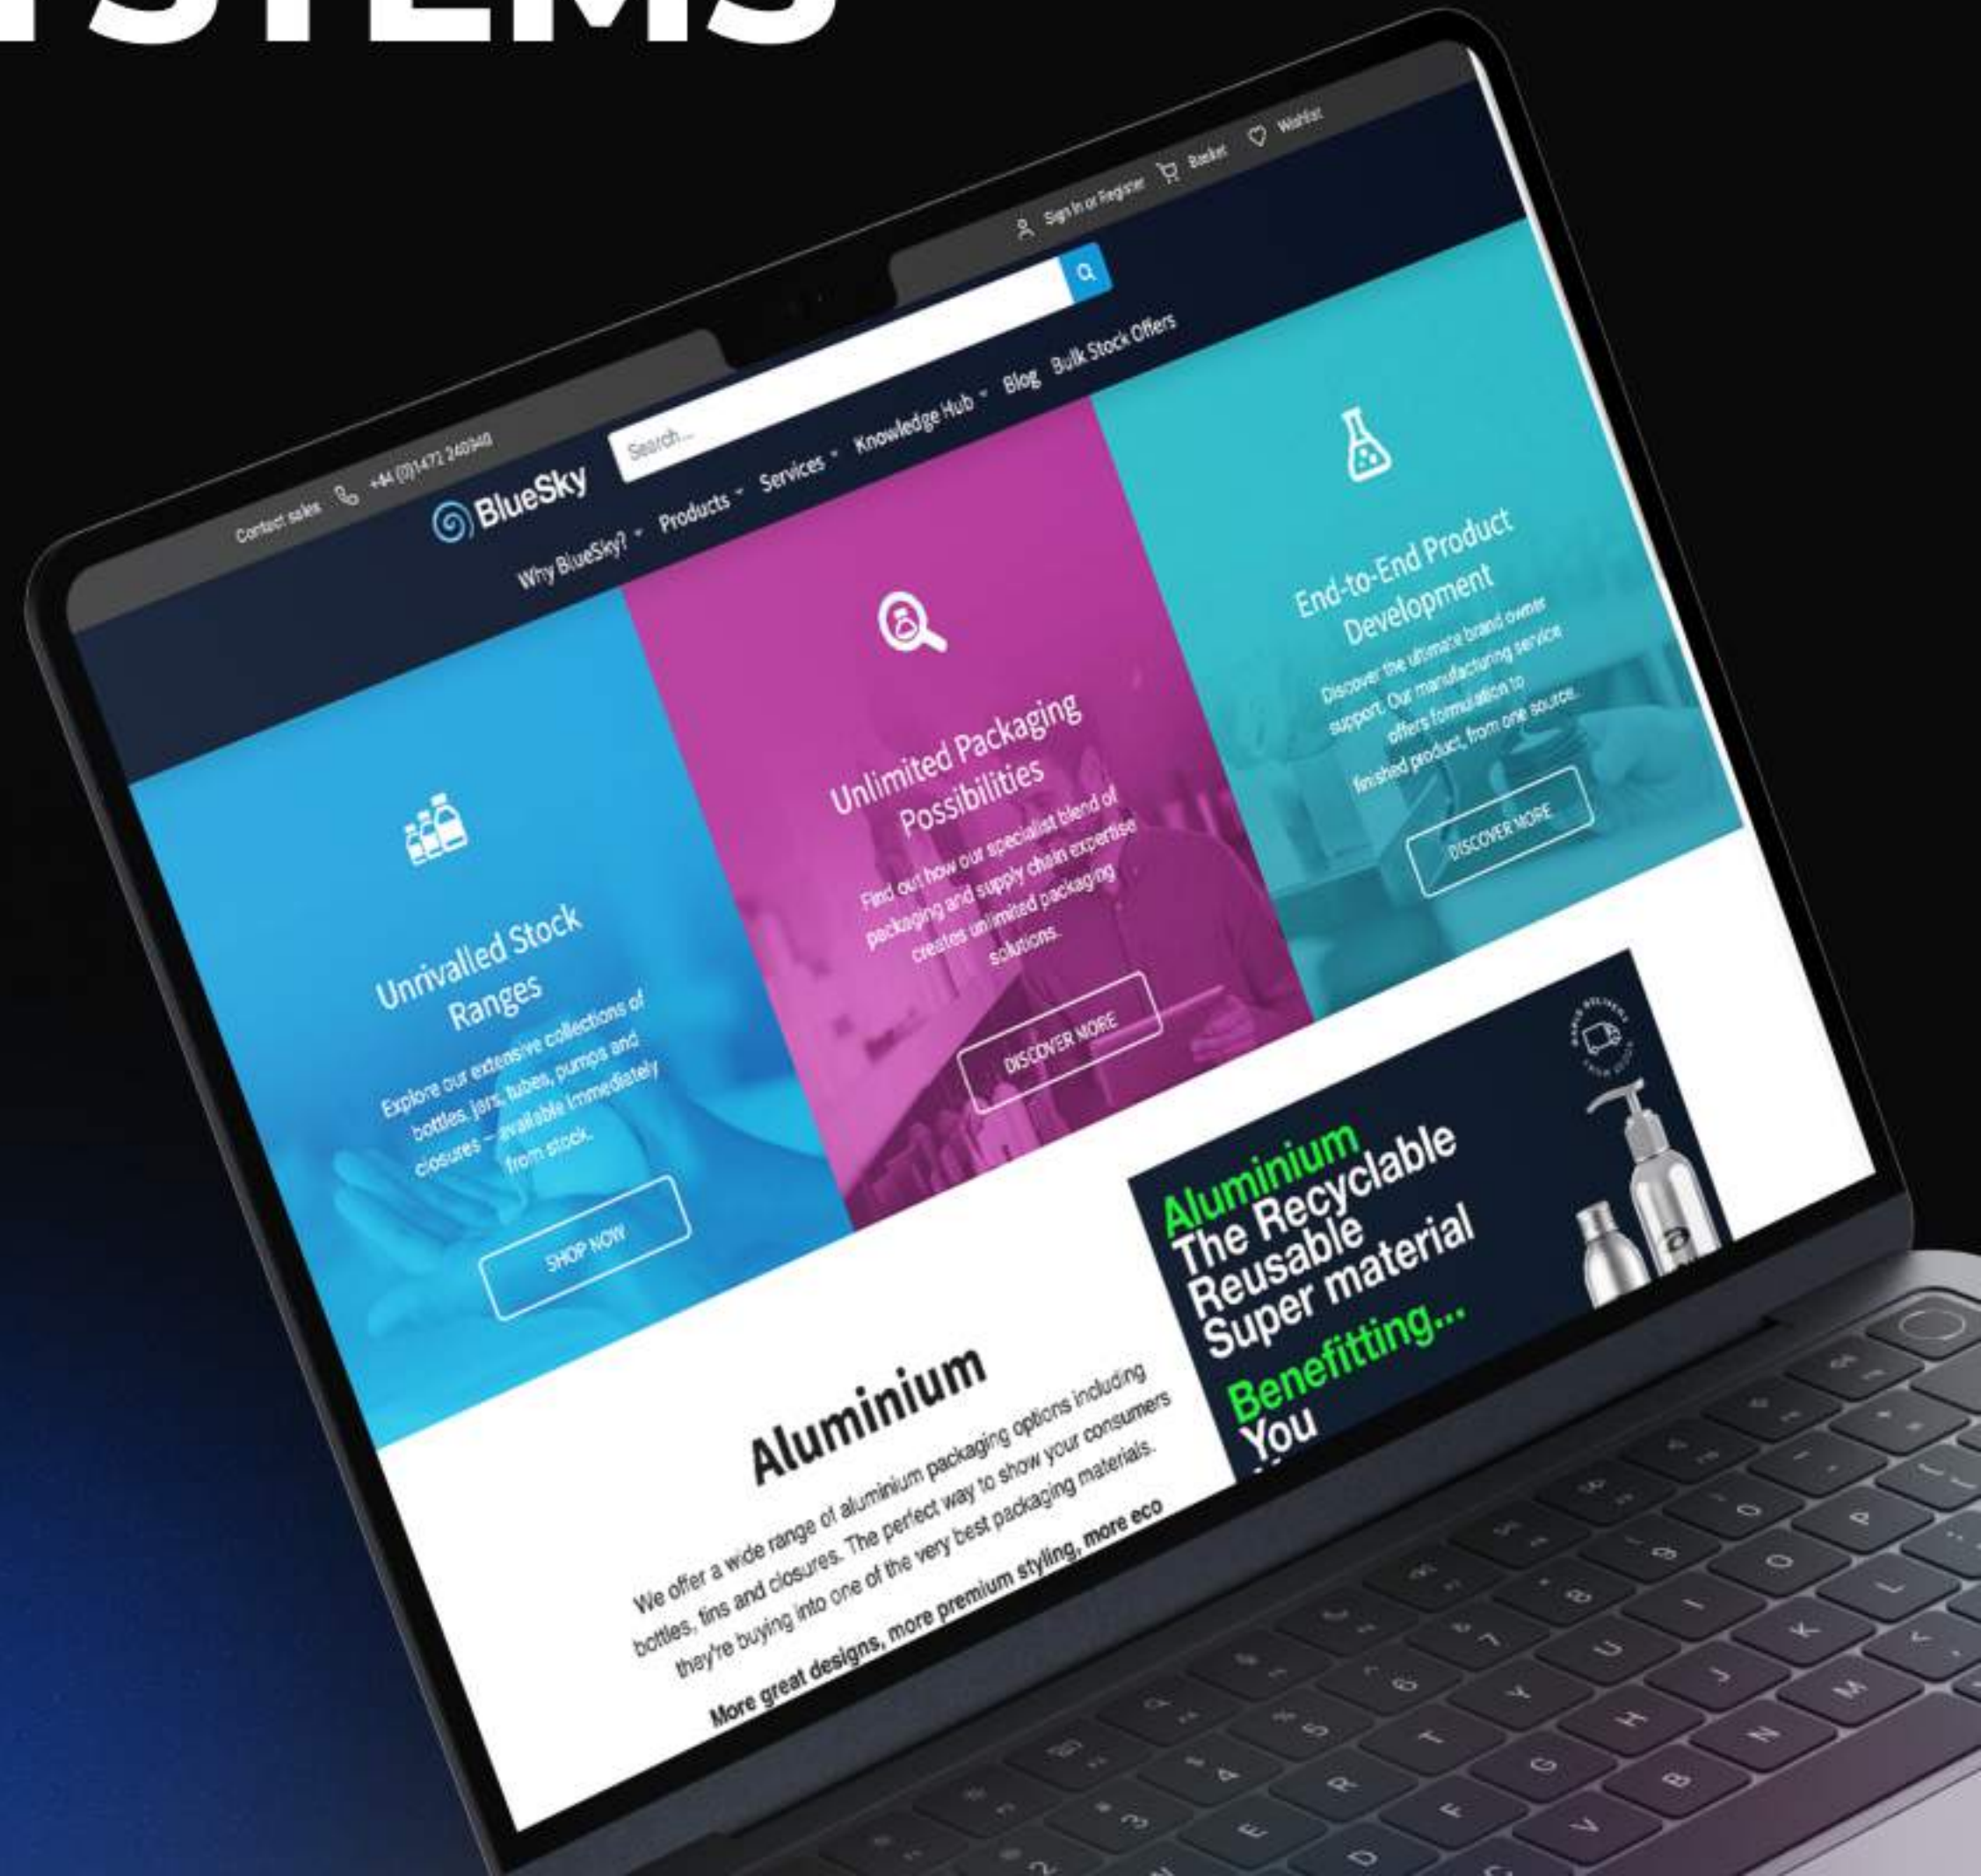

BLUESKY SOLUTIONS

 **United Kingdom**

Bluesky Solutions is a packaging wholesaler and a care products manufacturer. We automated their business operation and created an effective and multitasking ERP system for internal operations. Bluesky now has an ERP system tailored to its business needs.

We added significant value to all aspects of operational functions: reporting, information processing, data visibility, process control, inventory management, and many more.

DIGITALIZATION OF BUSINESS BY ERP SYSTEMS

AMBERSELL SOLUTIONS

 Lithuania

SmartTek team developed for Ambercell a healthcare supply chain management software.

For most healthcare organizations supply, chain management can be a difficult and nerve-taxing activity when considering time, money, and tracking available resources.

So, our solution helps to easily order, track and replenish the goods, providing you with great visibility of your inventory.

HORECA & RETAIL TRAINING PLATFORM

HoReCa & Retail training platform enables workers to train and retrain within the virtual experience at no supplementary cost or time investment from their colleagues or company.

Virtual Reality Platform was designed to give business organizations a reliable place to make use of immersive technology to teach employees job skills as well as soft skills.

The emphasis is on working with a diverse set of challenges for people entering or reentering the workforce.

Here future employees will have a chance to practice in real life environments to master skills that include working in complex environments that have ambient sound, demanding clients, or multi step procedures.

CLIENTS & PARTNERS

BRAINCHILD

BRAND | IQ | CREATIVE

ADVA SOFT

odoo

We build long-term relations and invest in partnerships to succeed as a united community of world-class organizations.

HOW WE WORK

From the beginning of any project until the end, we ensure that our solutions follow the best development and release practices.

1

INITIAL ANALYSIS

During the first contact, we want to learn your business goals and product vision and collect information on the most important functionalities.

2

PLANNING & ESTIMATION

Having discussed the details with a customer and approved the proposal, we plan work stages, specific deadlines, and the order of sprints.

3

WORK IN PROGRESS

We build your software feature by feature, working against the specification, incorporating your feedback, and keeping you updated on all our progress.

4

QA & TESTING

When developers implement a feature, we test it, validate it, and register defects. Our approach offers the best balance of quality, time, and cost.

5

RELEASE

When you are happy with the product, we will plan on the launch date of your software to go live and prepare everything necessary.

6

MAINTENANCE & SUPPORT

We also offer the clients our maintenance & support services to ensure constant support when you need to scale, integrate and update their products.

**WHAT OUR
CLIENTS SAY
ABOUT US**

We would like you to know that we are dependable. You can rely on us. Our customers are ready to attest to that.

THE PROJECT Animation & Illustrations for Interactive Game App Design \$10,000 to \$49,999 Jan. 2017 - Ongoing	THE REVIEW "They're experts for all things digital." JAN 31, 2020 5.0 ★★★★★ Quality: 5.0 Schedule: 5.0 Cost: 5.0 Willing to refer: 5.0	THE REVIEWER CEO, Software Development Studio Advertising & Marketing
Project summary: Smart Tek SaS, LLC (formerly UkrInSoft) handled the animation design and illustration for an interactive game app. The app was created in a commercial-grade style and has cinematic components.	Feedback summary: The app has yet to launch, but the partner is satisfied with the final product's hi-tech look and feel. Their team's militant project management style was effective for the partnership. Smart Tek SaS, L (formerly UkrInSoft) sticks to the project schedule and offers high availability for communication.
