

IDDO

Electronics

We wil transform your idea
INTO INNOVATIVE PRODUCT

Join the Industry 4.0. >>

We will take care of the full life cycle of your product

1. Project development

- **Hardware:** Wireless connections, PCB designs, simulations.
- **Firmware:** interfaces, systems, network protocols, drivers.
- **Software:** front-end, back-end, mobile, DevOps, data bases.
- **Mechanics:** 3D modelling, dimensioning, casing designs.

2. Prototyping

In a short time, we will create **the factual version of the product**, including complete software and casing. We'll also provide full technical documentation.

3. Testing

We will **test the device** under the extreme or identical to the real working conditions and we will do a certifications that allow introduction of device to the market.

4. Production

We will deliver **several devices for testing and presenting your idea**, a batch to see how the product performs under market conditions or we can help you with the start of production on a larger scale.

5. Maintenance

To ensure proper working of each of your products we also offer:

- consulting in the field of operation,
- maintenance services,
- warranty repairs.

6. End-of-Life monitoring

We monitor the market and control the availability of components to significantly extend the life of the products and **provide service for many years of work of the devices**, which guarantees stable and long-lasting solutions.

Our knowledge and experience will support **every production stage of your devices**, from planning to implementation on the market and maintenance so that each step guides to perfection of the life cycle of every product.

By working with us you gain:

- /// Full control over the design process** - our process is transparent.
 - We use Agile methodology. This means that we focus on working on your product, increasing its business value and that we deeply care for its quality.
 - We hold regular meetings to discuss the progress made on your project.
 - You decide how much time we spend on tasks.
- /// Control over the method of billing.**
 - Choose a fixed budget for small tasks and simple implementations or an hourly billing model for more complex projects.
 - You will always receive detailed documentation of working time from us.
- /// Access to the project repository.**
 - We create project documentation on an ongoing basis, and you have permanent access to it.
- /// Multiple communication channels.**
 - We use direct contact tools (e-mail, telephone, instant messaging).
 - We use advanced project management software (GitLab, Confluence).
- /// Always high quality of services.**
 - Thanks to detailed testing, we only deliver stable software.
 - We simulate normal and extreme operating conditions of devices, so we guarantee work even in demanding industrial environments.
- /// Multiple service linking options.**
 - Choose a single service, e.g. making of a prototype or let us take care of all the elements of your project. You may always choose more services when you move on to the next phase of implementation.
